

Connie's Story of Hope

I have been going to church for 30 years, but I was just going through the motions until I came to Bridge of Hope. Being here for the past 4 years has changed my perspective on what a Christian is and how a Christian loves. I have gone through many trials these 4 years, but Bridge of Hope has been there for me as my family. Bridge of Hope has helped me to realize that what Satan meant for bad, God has caused it to work for good. I have come to realize that life is not about me, but about glorifying the Lord in everything that I do. I have seen this modeled for me by others here and it is contagious. I have come to realize that the compassion that God has given me is to be used for His glory and from this day on, I plan on dedicating this compassion to helping not only people that come through Bridge of Hope, but everyone that I encounter in my life and journey. God has recently given me the opportunity to come on staff to work with the women at the new transitional housing and I look forward to this opportunity to show the love of Christ to them.
